

STUDENT INFORMATION

Name: Geke Rooney Ouko
Registration No: C026-01-0810/2024
Submitted: 2026-07-24 16:19:12

SCORE: 27/28 = 96.4% Grade: A

SECTION BREAKDOWN

Section	Score	Percentage	Status
Introduction to Unsupervised Learning	5/5	100.0%	PASS
K-Means Algorithm Fundamentals	3/3	100.0%	PASS
Distance Metrics in Clustering	3/3	100.0%	PASS
K-Means Implementation Steps	4/4	100.0%	PASS
The Elbow Method	3/3	100.0%	PASS
Data Preprocessing for K-Means	3/4	75.0%	PASS
K-Means Limitations and Challenges	2/2	100.0%	PASS
Real-World Applications of K-Means	4/4	100.0%	PASS

QUESTIONS TO REVIEW

Q19: Why is feature scaling important before applying K-Means?...
Feature scaling ensures all features have equal weight in distance calculations. Without scaling, features with larger numeric ranges (like income in thousands) would dominate those with smaller ranges (like age 0-100), leading to biased clustering results.
