

STUDENT INFORMATION

Name: Adelaide Myra
Registration No: C026-01-2342/2024
Submitted: 2026-07-24 11:40:39

SCORE: 27/28 = 96.4% Grade: A

SECTION BREAKDOWN

Section	Score	Percentage	Status
Introduction to Unsupervised Learning	5/5	100.0%	PASS
K-Means Algorithm Fundamentals	3/3	100.0%	PASS
Distance Metrics in Clustering	3/3	100.0%	PASS
K-Means Implementation Steps	4/4	100.0%	PASS
The Elbow Method	3/3	100.0%	PASS
Data Preprocessing for K-Means	3/4	75.0%	PASS
K-Means Limitations and Challenges	2/2	100.0%	PASS
Real-World Applications of K-Means	4/4	100.0%	PASS

QUESTIONS TO REVIEW

Q22: Why is StandardScaler from scikit-learn commonly used before K-Means c...

StandardScaler standardizes features to have similar ranges, ensuring no single feature dominates distance calculations due to its scale. Option A is incorrect because StandardScaler does not remove outliers. Option B is incorrect because K-Means does not require normal distribution.
