

STUDENT INFORMATION

Name: Kimani Kenneth Mukuha
Registration No: C026-01-0353/2018
Submitted: 2026-07-24 05:50:07

SCORE: 27/28 = 96.4% Grade: A

SECTION BREAKDOWN

Section	Score	Percentage	Status
Introduction to Unsupervised Learning	4/5	80.0%	PASS
K-Means Algorithm Fundamentals	3/3	100.0%	PASS
Distance Metrics in Clustering	3/3	100.0%	PASS
K-Means Implementation Steps	4/4	100.0%	PASS
The Elbow Method	3/3	100.0%	PASS
Data Preprocessing for K-Means	4/4	100.0%	PASS
K-Means Limitations and Challenges	2/2	100.0%	PASS
Real-World Applications of K-Means	4/4	100.0%	PASS

QUESTIONS TO REVIEW

Q4: Why might unsupervised learning be preferred over supervised learning ...

Unsupervised learning excels at exploratory analysis because it can discover unknown patterns, groupings, and relationships in data without being biased by predefined labels. Options A and D are false because unsupervised learning is not inherently more accurate and still requires data preprocessing. Option B is situational and not a guaranteed advantage.
