

STUDENT INFORMATION

Name: Mumo Jemimah Mukai
Registration No: C026-01-0756/2024
Submitted: 2026-07-24 05:29:33

SCORE: 27/28 = 96.4% Grade: A

SECTION BREAKDOWN

Section	Score	Percentage	Status
Introduction to Unsupervised Learning	5/5	100.0%	PASS
K-Means Algorithm Fundamentals	2/3	66.7%	OK
Distance Metrics in Clustering	3/3	100.0%	PASS
K-Means Implementation Steps	4/4	100.0%	PASS
The Elbow Method	3/3	100.0%	PASS
Data Preprocessing for K-Means	4/4	100.0%	PASS
K-Means Limitations and Challenges	2/2	100.0%	PASS
Real-World Applications of K-Means	4/4	100.0%	PASS

QUESTIONS TO REVIEW

Q8: What happens during the assignment step of K-Means?...

During the assignment step, every data point calculates its distance to each centroid and is assigned to the closest one. This creates the cluster groupings. Option A describes the update step, option C describes initialization, and option D is not how K-Means works as K must be specified beforehand.
